MSYSTEM

Web Data Logger DL8 Series

Web-Enabled Remote Terminal Unit for Monitoring, Event Reporting and Data Logging

GREENHOUSE

Industry : Agriculture, livestock raising

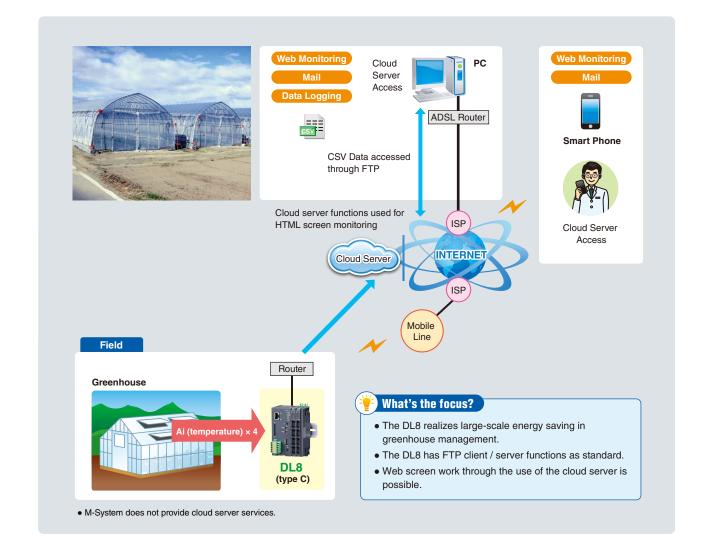

- Application : Remote monitoring of greenhouses
- The DL8 monitors temperature data measured in greenhouses (seedling houses) tens of kilometers away from the management office.

DL8 Series

EXAMPLES

APPLICATION

- Greenhouses on site are unmanned, located in a cold region where outdoor winter temperatures fall as low as -20°C (-4°F). In the past, measurement was done on site with handheld temperature measuring devices.
- Web screen monitoring is accessed through the cloud server, eliminating the stress of slow screen displays caused by low-speed communication.
