

# Power/Energy Monitors for Various Open Networks

- Single-phase 2-wire and 3-wire, three-phase 3-wire and 4-wire systems
- IP 52 front panel
- Various network communication and Ao/Do combinations selectable
- Up to 31st harmonic distortion measurement
- Software lock

## L53U

DIN rail mounted

- Modbus + Di/Do
- Ao x 4 points

Modbus

## 53U

96-mm square panel size

- Modbus + Di/Do
- Ao x 2 points + Di/Do
- Ao x 4 points

Modbus

## 54U / 54UC / 54UL

110-mm square panel size

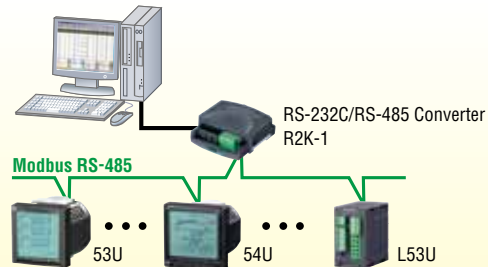

- Ao x 4 points
- Di/Do

Modbus CC-Link LONWORKS

## Monitoring and Storing Measured/Computed Values on the PC

The PC Recorder Light MSR128LU dedicated for energy monitors is free for downloading from our web site.

### NEW

#### LSMT4

- 10 analog outputs
- 2 Wh pulse outputs

### NEW

#### R7MWTU, R7EWTU, R7CWTU, R7LWTU

- Clamp-on current sensor use: easy installation
- 2 systems input

Modbus Ethernet CC-Link LONWORKS

### NEW

#### R9MWTU, R9EWTU, R9CWTU, R9LWTU

- Clamp-on current sensor use: easy installation
- Up to 8 systems input
- Time stamped data logging in SD card

Modbus Ethernet CC-Link LONWORKS
