MOUNTING REQUIREMENTS unit: mm

■ PANEL CUTOUT unit: mm

• Single mounting

• Clustered mounting

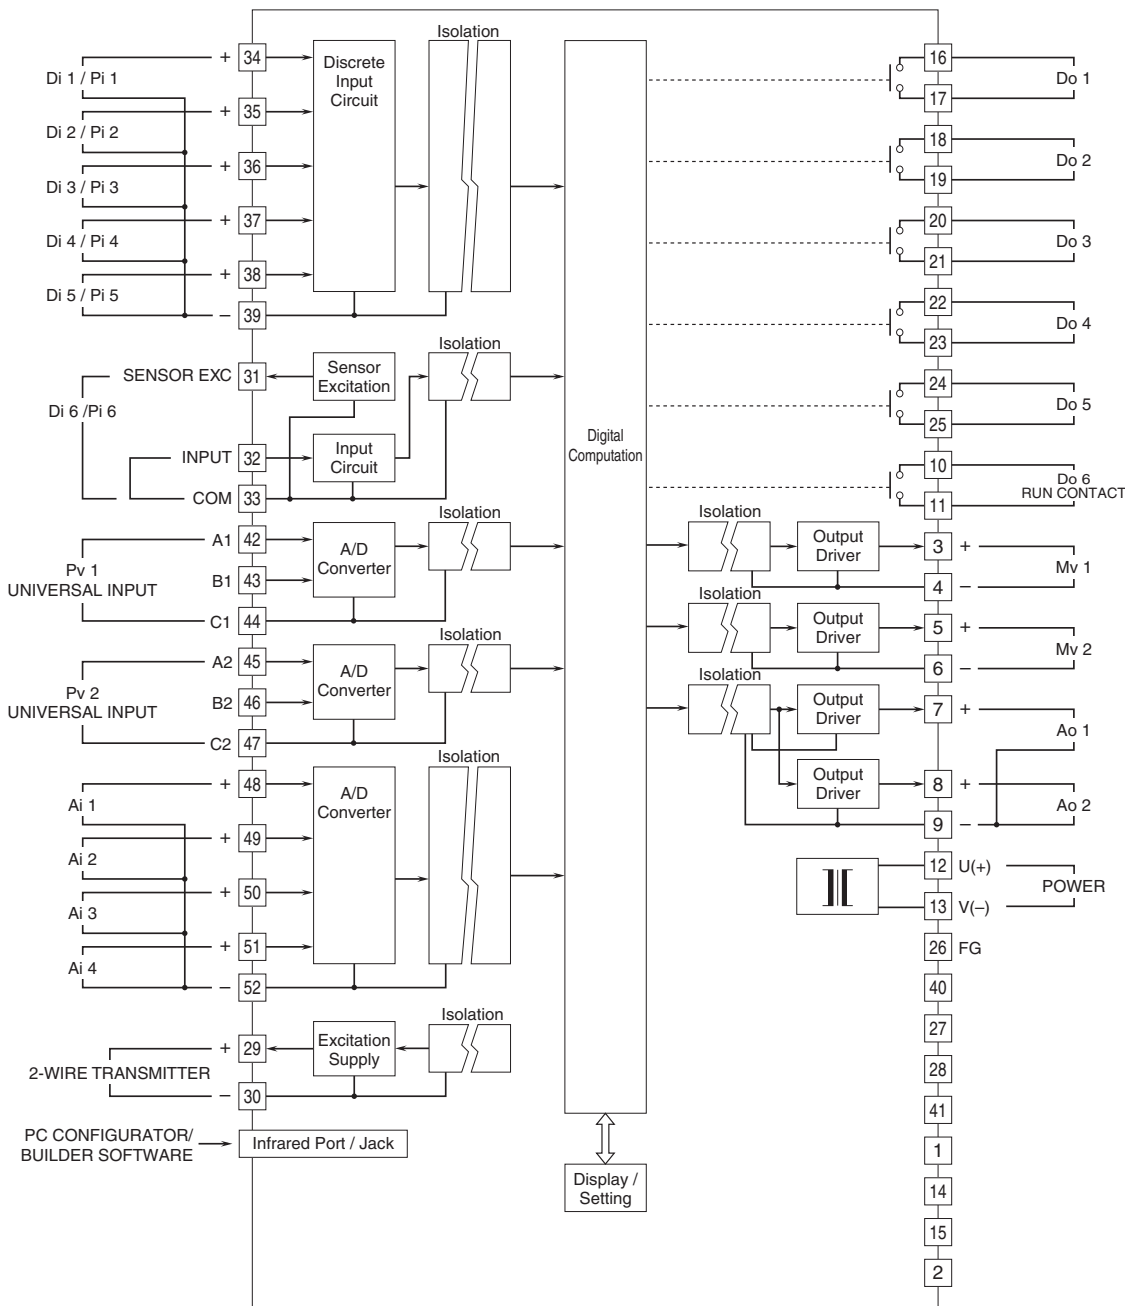

■ Caution

- IP55 is ensured for the front panel of the unit mounted independently to according to a panel. Test the sealing at the mounting surface once the device is installed.
- Set the unit on a vertical surface with its operation buttons at the lower side. Mounting in other directions may cause heat built up inside the unit and shorten its life span or degrade its performance.
- Ensure that there is sufficient space for ventilation inside a panel. Do not install above the devices that generate high heat such as heaters, transformers or resistors. Observe at the minimum of 30 mm (1.2") in all directions for maintenance purpose (e.g. wiring, removing or installing).
