

IRRIGATION CANAL GATE

Industry : Public utility, infrastructure

Application : Remote control of an irrigation canal gate

- The DL8 is used to monitor water level of an irrigation canal for a rice paddy and to remotely control a gate according to the level.
- The operator can visually confirm the gate operations and watch the area around the gate by a web camera connected through the same fiber optics data network.
- The DL8 sends e-mails to multiple users (farmers) in case of abnormal water level or the device failure.
